

mōhio

Mōhio: (verb) to know, understand, realise, comprehend, recognise.

Mōhio is the most flexible and cost effective aeronautical visualisation and charting solution on the market today. Remove the hardship and develop awesome charts with Mōhio.

**ICAO
Compliant**

Meets Annex 15
Charting Requirements

**Any Aero
Chart**

VRF and IFR Charts

**Multiple Data
Sources**

Chart data from
many sources

**Powerful
Simple**

Easy to learn,
powerful to use

Have Data? Build Charts

Create dynamic aeronautical charts that reflect the latest country information in a style and format that suits your needs with a system that enables quick modification and adaption to meet demanding AIRAC cycles.

3 | Apply airspace, routes, reporting points and more via AIXM data

2 | Apply and manipulate additional GIS data layers such as roads and cities

1 | Start with a base map from any data source

Aerodrome Charts

Develop accurate Aerodrome charts from multiple GIS data sources.

Satellite Imagery

Import and overlay satellite images onto your aero charts.

Custom Outputs

Create customised colour charts to enhance situational awareness.

Chart Visual Navigation

Develop Visual Navigation charts to meet ICAO standards and customise to your own specification.

Colour Terrain Charts

Mōhio allows you to chart colour terrain to provide a better situational awareness for users flying IFR through terrain.

AIP Plate

Develop aerodrome plates and visual and instrument charts for inclusion in your AIP.

Great Support - Globally

Access support when you need it. Extensive online training combined with Aeropath experts online ensures your team is getting the most out of your charting operation quickly and without hassle.

3D Charts - Want to fly around your chart?

Mohio allows you to output 3D visualisations allowing you to zoom and fly around a 3D airspace, procedures, obstacles and terrain.

Specifications

Mōhio has an innovative roadmap that will introduce a host of new features and automation. Mōhio Basic will provide the capability to meet the ICAO Annex 15 requirements. Subsequent versions will enable greater customisation and efficiencies.

	Mōhio Basic	Mōhio Advanced
AERO CHART TYPES		
Visual Charts	ICAO Specification	Country Specific Specifications
Instrument Charts	ICAO Specification	Country Specific Specifications
Aerodrome and Ground Movement charts		✓
Precision Terrain and Type A/B Charts		✓
DATA		
Automatic Airspace Geometries		✓
Data Export in various formats	✓ Standard	✓ Advanced
CUSTOMISATION		
Custom / PBN Charts		✓
ICAO Procedure profiles	✓ Standard	✓ Advanced
